

JAYANTH DASAMANTHARAO

New Brunswick, NJ — (848)313-5617 — jayanthdasamantharao@gmail.com — [linkedin.com/in/djayanth](https://www.linkedin.com/in/djayanth)

PROFESSIONAL EXPERIENCE

Applied AI Engineer, EliteUS Software Solutions Aug 2024 - Present | Edison, NJ

- Performed large-scale behavioral and trend analysis over 5M+ interaction records to identify engagement drivers and system performance gaps, improving user engagement by 30%.
- Designed automated monitoring and anomaly detection pipelines to surface KPI deviations and trend breaks across production systems.
- Built SQL/Python-based data pipelines for ingestion, transformation, validation of large enterprise datasets.
- Developed interactive dashboards and executive reporting tools using Tableau and Power BI, enabling self-serve analytics and real-time KPI monitoring for cross-functional teams.
- Partnered with cross-functional stakeholders to translate ambiguous business questions into structured analytical solutions and measurable KPIs.

Data Science Intern, Harvest Software Solutions June 2023 - Sept 2023 | Jacksonville, Florida

- Analyzed large advertising datasets using SQL and Python to uncover performance drivers, increasing campaign visibility from 15% to 45%.
- Built ML services and NLP APIs using XGBoost, H2O AutoML, and FastAPI, improving sentiment classification accuracy by 65% and campaign spend efficiency by 50%.
- Designed SQL/Python data processing and evaluation pipelines for feature engineering, model training, and validation, enabling reliable business reporting and decision support.

Application Development Associate, Accenture June 2021 - Aug 2022 | Hyderabad, India

- Developed and optimized Python-based ETL and data processing pipelines using hash maps, sets, indexed lookups to efficiently clean, deduplicate, and transform large datasets, reducing production issues by 50%.
- Implemented SQL workflows and joins with partitioning, indexing, and window functions, enabling efficient aggregation and analysis over millions of records in AWS Athena and Redshift.
- Developed operational/executive dashboards using Tableau to track workflow SLAs, system reliability, KPIs.
- Improved system performance, data reliability by 25% through validation automation, pipeline optimization.

TECHNICAL SKILLS

Programming: Python, R, SQL. **Frameworks:** Pandas, NumPy, Scikit-learn, Dash, FastAPI.
Data Analytics : SQL (Redshift, Athena), Data Warehousing, Data Modeling, ETL, Root Cause Analysis, KPI Design.
Data Visualization : Tableau, Power BI, Dashboard Development, Dash analytics, Self-Serve Reporting Systems.
Statistical Analysis : Hypothesis Testing (t-tests), A/B Testing, Regression Analysis, Classification, Correlation Analysis.
Cloud: PostgreSQL, Data Warehousing, AWS (Bedrock, Athena, Redshift), GCP, Azure.

EDUCATION

Rutgers University, Master of Science in Data Science Sept 2022 - May 2024 | New Brunswick, NJ

Personal Website: <https://jayanthdasamantharao.github.io/>

Andhra University B.Tech in Electrical and Electronics Engineering 2017 - 2021 | Visakhapatnam, India

RESEARCH PROJECTS

Enterprise Dash Analytics Platform (10M+ Rows): Designed and developed a scalable analytics dashboard using Python (Dash) and SQL to process and visualize 10M+ transaction and interaction records for operational monitoring at Fedway.

Automated Audit & Trend Break Detection System: Developed statistical monitoring pipelines to detect KPI deviations and anomalies using hypothesis testing, correlation analysis, threshold-based alerts; built metric bridges and validation workflows for root-cause analysis.

Self-Driving Cars (Computer Vision): Built autonomous driving cars with vision pipeline using CNNs, YOLO, Faster R-CNN, achieving 95%+ object detection accuracy.
