

JAYANTH DASAMANTHARAO

New Brunswick, NJ — (848)313-5617 — jayanthdasamantharao@gmail.com — [linkedin.com/in/djayanth](https://www.linkedin.com/in/djayanth)

PROFESSIONAL EXPERIENCE

Data Scientist - Fedway Associates, EliteUS Software Solutions Aug 2024 - Present | Edison, NJ

- Designed and deployed predictive ML models over 5M+ interaction records, improving user engagement by 30% and translating business objectives into measurable product KPIs.
- Built and validated classification and regression models using advanced feature engineering, offline evaluation, and A/B testing to optimize targeting and engagement outcomes.
- Performed large-scale behavioral data analysis using SQL and Python to identify patterns, define success metrics, and guide product decision-making.
- Deployed scalable ML services and feature pipelines on AWS using Python and FastAPI, implementing monitoring, automated evaluation, and human-in-the-loop feedback systems to ensure production reliability.

Data Science Intern, Harvest Software Solutions June 2023 - Sept 2023 | Jacksonville, Florida

- Developed and deployed classification models using XGBoost and H2O AutoML, improving sentiment prediction accuracy by 65% and campaign efficiency by 50%.
- Engineered scalable ML pipelines for large advertising datasets, increasing campaign visibility from 15% to 45% through structured feature engineering and experimentation.
- Conducted exploratory data analysis and built SQL/Python workflows for feature extraction, validation, and repeatable model training in production environments.

Application Development Associate, Accenture June 2021 - Aug 2022 | Hyderabad, India

- Developed and optimized Python-based ETL and data processing pipelines using hash maps, sets, and indexed lookups to efficiently clean, deduplicate, transform large datasets, reducing 50% production issues.
- Implemented SQL workflows and joins with partitioning, indexing, and window functions, enabling efficient aggregation and analysis over millions of records in AWS Athena and Redshift.
- Applied batching, caching, and algorithmic optimizations for data validation and pipeline execution, improving system performance and reliability by 25%.

TECHNICAL SKILLS

Programming: Python, R, SQL. **Frameworks:** PyTorch, TensorFlow, Pandas, Numpy, Hugging Face Transformers.
ML & Statistics: Classification, regression, feature engineering, model evaluation, A/B testing, statistical analysis.
GenAI & LLMs: Transformer-based models, LLM fine-tuning, RAG, embeddings, multimodal modeling.
Evaluation: Golden datasets, A/B testing, human-in-the-loop review, telemetry, monitoring, regression detection.
Cloud & MLOps: PostgreSQL, Data Warehousing, AWS (Sagemaker, EMR), GCP, Azure, Pinecone, Chroma.
Data Engineering: Databricks, SQL-based data modelling, REST APIs, CI/CD, telemetry monitoring.

EDUCATION

Rutgers University, Master of Science in Data Science Sept 2022 - May 2024 | New Brunswick, NJ
Personal Website: <https://jayanthdasamantharao.github.io/>

Andhra University B.Tech in Electrical and Electronics Engineering 2017 - 2021 | Visakhapatnam, India

RESEARCH PROJECTS

LLM-Powered Retrieval & Question Answering System (Production): Built and deployed an LLM-assisted retrieval system using embeddings and RAG pipelines, incorporating evaluation-driven iteration to improve response quality and factual grounding.

Bayesian Classification Model: Implemented Bayesian logistic regression in PyMC3 to predict medical outcomes, achieving 0.85 F1-score with robust statistical validation.

Self-Driving Cars (Computer Vision): Built autonomous driving cars with vision pipeline using CNNs, YOLO, Faster R-CNN, achieving 95%+ object detection accuracy.
